Introduction

The epidemiology of Alzheimer's disease

Clinical and neuropsychological assessment of dementia

The genetics of Alzheimer's disease

Brain imaging in Alzheimer's disease

Electrophysiology of Alzheimer's disease

Recent advances in neuropathology

The association of clinical and neurobiological findings and its bearing on the classification and aetiology of Alzheimer's disease

Subunit structure of the Alzheimer tangle

Neuroanatomical aspects of neurotransmitters affected in Alzheimer's disease

The cholinergic hypothesis—ten years on

Non-cholinergic neurotransmitter abnormalities in Alzheimer's disease

Biochemical studies of nerve cells and energy metabolism in Alzheimer's disease

Correlations between neuropathological and neurochemical changes

Dementia and Parkinson's disease—pathological and neurochemical considerations

Management of dementia: a review

Cholinergic approaches to the treatment of Alzheimer's disease

Pharmacological treatments of dementia (non-cholinergic)

The secondary dementias of middle and later life

The transmissibility of dementia

1986 Vol. 42 No. 1

Professor Sir Martin Roth chaired the committee, which included Professor J A N Corsellis, Dr L L Iversen and Professor W A Lishman, that planned this number of British Medical Bulletin. We are grateful to them for their help, and particularly to Professor Roth and Dr Iversen who acted as Scientific Editors for the number.

British Medical Bulletin is published by Churchill Livingstone for the British Council, 10 Spring Gardens, London SW1A 2BN.
The 36-Hour Day
NL Mace, PV Rabins, B Castleton, C Cloke, E McEwen

The 36-Hour Day has been specifically written for those who are involved in the care of confused elderly people at home. It is a practical guide to looking after sufferers of Alzheimer’s disease, related dementing illnesses, and memory loss in later life, which concentrates on aspects of care for those in the early and middle stages of these illnesses. Information and advice is combined with specific examples, and all of the medical, legal, financial and emotional aspects of caring are covered. Topics include dealing with baffling and unpredictable symptoms, finding support in the community and helping the family to cope with this extraordinarily stressful situation.

This book has already been enormously successful in the USA where it has sold over a quarter of a million copies. This British edition has been extensively revised and updated and takes account of all the legal and social differences in the UK.

0 340 37012 2 Paperback £5.95
Published in co-operation with Age Concern.

Available from all good bookshops.

First volume in a new series from Churchill Livingstone

Recent Advances in Psychogeriatrics—1
Edited by Tom Arie

1988 248 pages 27 illus hardback £25.00

■ This is the first volume in a new series reflecting the rapid advances in this new field of psychiatry in the elderly.
■ An international team of experts cover topics in the fields of basic sciences, clinical practice, organisation and education.
■ Particular emphasis is given to recent developments in research on the dementias.

Contents and Contributors:
Introduction Tom Arie (Nottingham, UK) . . . The potential of the ageing brain for structural regeneration Marian C. Diamond (California, USA) . . . Epidemiology of mental disorders in old age M. Robin Eastwood, Sandra L. Corbin (both Toronto, Canada) . . . Survival in dementia: a review Alexander B. Christie (Dumfries, UK) . . . Dementia: genetics Steven S. Matsumura, Lissy F. Jarvik, Vinod Kumar (all Los Angeles, USA) . . . The heterogeneity of Alzheimer’s disease and its implications for scientific investigations of the disorder Sir Martin Roth, Claude M. Wischik (both Cambridge, UK) . . .
The reversible dementias Peter V. Rabins (Baltimore, USA) . . .
Quality of care in institutions David Wilkin, Beverley Hughes, David J. Jolley (all Manchester, UK) . . . New views on old age affective disorders Felix Post (London, UK) Kenneth Shulman (Toronto, Canada) . . . Measurement in psychogeriatrics Garry Blessed (Newcastle-upon-Tyne, UK) . . . New radiological techniques for studying the brain Brian S. Worthington (Nottingham, UK) . . . International comparative studies John R. M. Copeland (Liverpool, UK), Barry J. Gurland (New York, USA) . . . The educational potential of psychogeriatric services Tom Arie, Robert G. Jones, Christopher W. Smith (all Nottingham, UK) . . . Psychogeriatrics in the programme of the World Health Organization John H. Henderson, David M. Macfadyen (both Copenhagen, Denmark).

Childhood Epidemiology

Scientific Editors: E D Alberman & C A Peckham

Introduction E D Alberman & C A Peckham 117
Perspectives and Patterns P O D Pharoah 119
Current epidemiology of childhood infections S Hall 127
Physical development J M Tanner 131
The prevalence of neurological disability P O D Pharoah & I McKinlay 139
Hearing impairment in childhood C A Peckham 145
Vision in childhood C A Peckham 150
Behavioural and intellectual development P J Graham 155
Respiratory disease in the neonatal period P F Field & R A D Milner 163
Respiratory disease in childhood H R Anderson 167
The epidemiology of hypertension in children M de Swiet 172
Gastro-intestinal tract A M Cotterill & J A Walker-Smith 176
Urogenital malformations and disease A C Berry & C Chantler 181
Endocrine disorders: diabetes mellitus, congenital hypothyroidism, and congenital adrenal hyperplasia D B Dunger & D B Grant 187
The Haemopoletic system in childhood O B Eden 191
Musculo-skeletal disorders in childhood A J Silman 196
The epidemiology of Adolescent behaviour problems B Bewley 200
Child health and the environment J Golding 204
Prevention and health promotion E Alberman 212
Index 217

1986 Vol. 42 No. 2

Professor E Alberman chaired the committee, which included Professor P Pharoah, Professor C Peckham and Dr J Golding, that planned this number of the British Medical Bulletin. We are grateful to them for their help, and particularly to Professor Alberman and Professor Peckham who acted as Scientific Editors for the number.

British Medical Bulletin is published by Churchill Livingstone for the British Council, 10 Spring Gardens, London SW1A 2BN.
Endoscopic Surgery

Scientific Editors: R A Miller & J E A Wickham

Introduction J E A Wickham 221
Endoscopic instrumentation: evolution, physical principles and clinical aspects R A Miller 223
Rigid endoscopes: optical and design considerations R A Miller & T R Hollingsworth 226
Aspects of endoscopic documentation R H Quint 230
Endoscopic surgery in otolaryngology D J Howard & V J Lund 234
Mediastinoscopy V F Trastek, J M Piehler & P C Pairolero 240
Bronchoscopy D R Sanderson 244
Therapeutic endoscopy of the upper gastrointestinal tract P M Smith 249
Biliary tract and pancreas D L Carr-Locke & P B Cotton 257
Colonoscopy C B Williams 265
Vascular endoscopy: current state of the art T A Sanborn 270
Endoscopic surgery of the upper urinary tract R A Miller 274
Lower tract endoscopy J P Blandy & C G Fowler 280
Operative pelviscopy K Semm 284
Fetoscopy C H Rodeck & K H Nicolaides 296
Arthroscopy: the endoscopy of joints D J Dandy 301
Laser endoscopy S G Bown 307
Advances in endoscopic diathermy J W A Ramsay 314
Ultrasound in association with endoscopy H Watanabe 318
Interventional radiology D Rickards 325
Small animal endoscopy J V Davies 330
Veterinary endoscopy in large animals E L Gerring 333
Index 337

1986 Vol. 42 No. 3

Mr J E A Wickham chaired the committee, which included Mr R A Miller, Mr D J Dandy and Dr P E Cotton, that planned this number of the British Medical Bulletin. We are grateful to them for their help, and particularly to Mr Miller and Mr Wickham who acted as Scientific Editors for the number. British Medical Bulletin is published by Churchill Livingstone for The British Council, 10 Spring Gardens, London SW1A 2BN.
As the medical profession searches tirelessly for the means to further the investigation and treatment of conditions which have so far eluded it, there is one company motivated towards helping achieve that end. The company is Pilkington Medical Systems. Their expertise in electro-optical systems as manufacturers of medical lasers and endoscopes combined with the considerable research and development capability has positioned them as one of the world's foremost medically innovative companies.

So, as the world looks for the next healthcare breakthrough, the medical profession can look to Pilkington Medical Systems — the focus of medical technology.

## Calcium, Drugs and Hormones
